

Environmental Policy

ST Engineering is committed to achieving sustainable growth through sound environmental practices.

We shall evaluate the environmental aspects of our business operations so that appropriate control measures can be implemented to mitigate environmental impacts.

We shall comply with all regulatory requirements, relevant international environmental standards and other obligations.

We shall contribute to the protection of our environment by preventing pollution, minimising waste, conserving resources and proactively reducing our carbon footprint and minimising our consumption of energy and water resources.

We shall communicate our Environmental policy with our stakeholders, including our employees.

We shall periodically review our set goals and continually enhance our practices, controls and training.
